

If HIV medications will **not** be taken, the visit schedule is as follows:

Procedures	Screen (1 st visit)	First day of study	Fourth day visit	One month visit	Six month visit	36 month visit
Lymph Node Biopsy		X	X	X	X	X
Colonoscopy		X				X
Blood draw	X	X	X	X	X	X

Visits that only include blood draws will only last about 10 minutes and all visits occur at the University of Minnesota.

Parking and transportation assistance provided by the study.

Screen (initial) visit: At this visit we will explain the consent form in detail. If you agree to do the study, we will also draw blood to make sure you have HIV and are qualified if you agree to do the study.

Day 1 This visit will include a blood draw with a colonoscopy and lymph node biopsy.

Day 4 On this visit, you will have your second lymph node biopsy procedure and then go home after several hours.

One month visit: This visit will include blood draw and also your third lymph node biopsy procedure.

6 month visit: This visit will include blood draw, your second colonoscopy and and fourth lymph node biopsy.

36 Month visit: This visit will include blood draw, your second colonoscopy and and fourth lymph node biopsy.
